5A

Attach the Foot Connector Bar Latch to the Seat Deck.

Find pre-drilled hole on one of the Seat Deck Slat Supports.

Attach Latch using Screw and Washer as shown.

Once screw is tightened, be sure Latch is pointing vertically upwards, as shown, holding Foot Connector Bar in place.

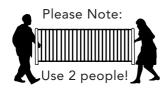

Back Deck

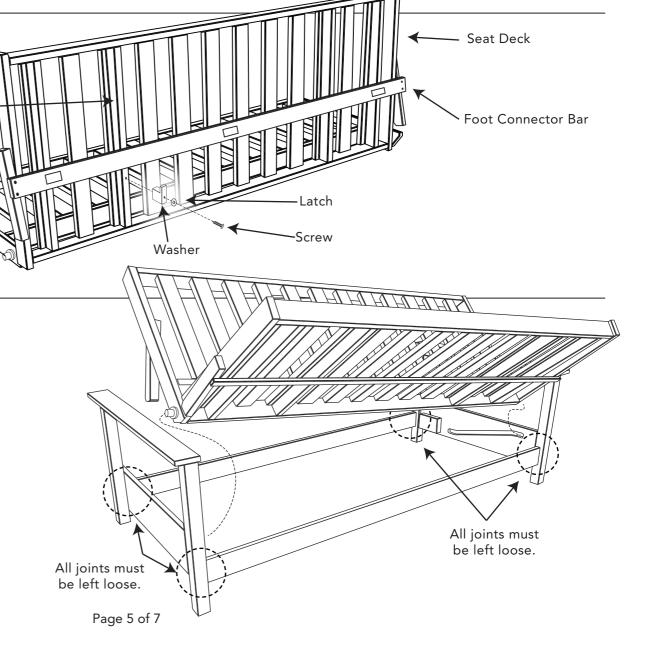

Slat Support-

Fit the Seat Back Decks to the Frame. Insert the decks into the partially completed frame. This is where a helper may be useful.

When the Plastic Runners are in the grooves in the Arms, slide the assembly towards the back of the frame.

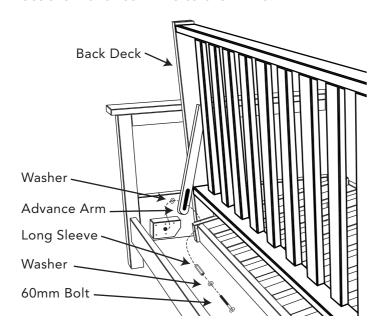

6C Watch our videos at www.stratafurniture.com/videos.html

Tighten all eight Bolts.

Fit the Strap to the Back Deck.

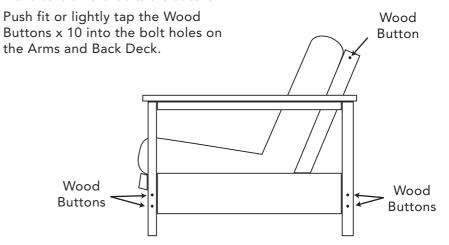

6B

Connect the Advance Arms to the Arms.

Fit the Wood Buttons to the Arms and Back Deck

Finally, when the frame is fully assembled, make sure all the bolts are secure.

Operating Instructions

Watch our videos at www.stratafurniture.com/videos.html

To convert into a bed position

- •Lift seat deck up just so it clears the front stretcher. PULL HORIZONTALLY until the rollers hit the top of the front of the groove. Then lift into vertical position. At this point, it will look like the picture above. If you lift vertically too quickly, the frame will slam down.
- •Resting the seat deck on your hip, push the seat deck and mattress forward (towards the back deck). Turn the latch 90° to release the foot connector bar, and pull it out towards you until feet are fully extended.
- •Sit the frame down gently.

To convert into a couch position

- •Remove any pillows and other obstructions
- Push up the mattress into an inverted couch position and then lift up the seat deck into a vertical position.
- •Resting seat deck on your hip, push the foot connector down all the way so that the foot connector rests on the side rail. Turn the Latch 90° to lock the Foot Connector Bar in place.
- •With one hand lightly push the seat deck down. Then, at the same time, pull on the top of the mattress with one hand (or the strap if using a strap) and push in the seat deck with your other hand or leg until it locks in.
- *DO NOT FORCE! Frame should operate easily.

Note: Never lift the frame by the arm caps - Always lift from the bottom of the arms.
