Locking Pins
x 4

Assembly Instructions for Carriage Body, all sizes

2A

Fit the Wooden Dowels into the Stretchers

2B

Attach the Arms* to the Stretchers using hardware in arm box.

Be patient, it can be tricky to start the bolts in the nuts - a screwdriver will help you line up the Barrel Nut with the Bolt.

Drive the Bolts in until they just catch the Nuts.

It is important that these bolts are left loose!

***Your arm style may vary.**

Assembly Instructions for Carriage Body, all sizes

3A

Join the Seat and Back Deck together.

Lay both Decks out flat on the floor with the *stickers facing upwards*.

The Seat Deck fits inside the Back Deck as shown. Slip the Long Clevis Pin through the small end of the Plastic Runner, then two small sleeves, then through the hole in the Back and Seat Deck. Secure with a Washer and Locking Pin.

3B

Fit the Advance Arms to the Back Deck.

Rotate the Back Deck upright. Slide the short clevis pin through the back deck, then through a washer and then through the hole in the Advance Arm. Secure with a Locking Pin.

Assembly Instructions for Carriage Body, all sizes

4A

Attach the Connector Bar to the Legs.

Lift the Seat Deck so it is resting on the Back Deck, the feet should be pointing DOWNWARDS.

Line up the holes between the Connector Bar and the Feet. Make sure the recess for the bolt is facing outwards.

CAUTION: The metal insert in the foot **MUST** be facing the Back Deck.

Use four Bolts (60 mm) and bolt it in place.

4B

Assemble the Bungees under the Seat Deck.

Screw the Bungees to the side of the two inner rails. Screw the lower end of the Bungee chord first, then stretch the Bungee over the Connector Bar. Screw in the top end.

FOR QUEEN SIZES: Screw the additional, smaller bungees to the middle, inner rails. (Not shown)

Assembly Instructions for Carriage Body, all sizes

5A

Fit the Seat Back Decks to the Frame.

All joints must be left loose.

All joints must be left loose.

Insert the decks into the partially completed frame. This is where a helper may be useful.

When the Plastic Runners are in the grooves in the Arms, slide the assembly towards the back of the frame.

Please Note:

Use 2 people!

5B

Tighten all eight Bolts.

5C

Connect the Advance Arms to the Arms.

Assembly Instructions for Carriage Body, all sizes

6A

Fit the Strap to the Back Deck.

6C

Fit the Wood Buttons to the Arms.

Finally, when the frame is fully assembled, make sure all the bolts are secure.

Push fit or lightly tap the Wood Buttons into the bolt holes on the Arms.

Operating Instructions

Watch our videos at www.stratafurniture.com/videos.html

To convert into a couch position

- Remove any pillows and other obstructions
- Push up the mattress into an inverted couch position and then lift up the seat deck into a vertical position.
- Resting seat deck on your hip, push the foot connector down all the way so that the foot connector rests on the side rail.
- With one hand lightly push the seat deck down. Then, at the same time, pull on the top of the mattress with one hand (or the strap if using a strap) and push in the seat deck with your other hand or leg until it locks in.

***DO NOT FORCE!** - Frame should operate easily.

To convert into a bed position

- Lift seat deck up just so it clears the front stretcher. PULL HORIZONTALLY until the rollers hit the top of the front of the groove. Then lift into vertical position. At this point, it will look like the picture above. If you lift vertically too quickly, the frame will slam down.
- Resting the seat deck on your hip, push the seat deck and mattress forward (towards the back deck) until you can pull the foot connector bar out towards you until feet are fully extended.
- Sit the frame down gently.

Note: Never lift the frame by the arm caps - Always lift from the bottom of the arms.
